Genetec™ 25

Desafíos que enfrentan las organizaciones todos los días

Abrumados por el volumen de datos, sistemas y aplicaciones

Complejidad de operar y mantener múltiples sistemas aislados (silo)

Emergencia de nuevas amenazas más allá de la seguridad física

Unificación

Integración simplemente no es lo mismo que Unificación

Integración

- Requiere que trabaje con múltiples sistemas
- Agrupa sistemas que realmente nunca fueron diseñados para que trabajaran juntos
- Limita su libertad para realizar actualizaciones
- No obtiene las ganancias de productividad y eficiencia a largo plazo

Unificación

- Administra todo desde una sola aplicación
- Aborda múltiples necesidades
- Proporciona una experiencia consistente
- Se beneficia de los ahorros en entrenamiento, infraestructura y administración del ciclo de vida

Nuestro portafolio de productos se dirige a necesidades más amplias
